# Streams of Income Worksheet

(can be used to calculate Gross or Net Income)

## To calculate streams of income:

First, list sources of income, amounts and how often received.

Then, multiply each line item amount by how frequent income is received in one year.

Income typically includes: Employment, bonuses, tips, commissions, rental income, dividends from stocks, interest earnings from savings, child support, alimony

Once per week = \$amount X 4.333

Every other week = \$amount X 2.167

Twice per month = \$amount X 2

Monthly = \$amount X 1

Quarterly = \$amount ÷ 3

Annually = \$amount ÷ 12

# Monthly Target Spending Percentages

This worksheet will help you determine your target percentage of Spendable Income to be allocated to each Spending Category.

- **First:** Determine your Spendable Income \$ \_\_\_\_\_  
Remember, Spendable Income = Net Monthly Income (or take-home pay) Minus the Tithe.
- **Second:** Multiply Actual Target % (that you determine) for each Spending Category by Spendable Income.  
Actual Target % Total should = 100%.  
Actual Target \$ Total should = Spendable Income.

*The Spending Target Guidelines are suggested ranges for each Spending Category (after giving and taxes). These percentages were compiled from various sources including Crown Financial Ministries, Lee Jenkins Financial LLC., Dave Ramsey, other sources and personal experience.*
